Agriculture & construction equipment makers call for action on fake product trading

New Delhi, According to a FICCI Cascade report the Indian economy loses Rs 1.17 lakh crore due to smuggling & counterfeiting in five prominent sectors including Capital Goods (Machinery and Parts) and Consumer (Electronics) Durables. The goods sales from counterfeiting is expected to double up globally to Rs 119.7 lakh crore by 2022. India has been no exception to the menace.

Key to curb this menace is to educate the customer and spread awareness in the market about easy identification of genuine products based on product attributes and provide easy access to brand's authorized sales & service channel.

Among others, Honda India Power Products (HIPP), a reputed and leading company in the field of Power Products in India for over 35 years is leading the fight

against this menace. HIPP has launched its "Know your Honda" campaign to educate its valued customers and through its IP Cell is also actively monitoring online and offline sales platforms to flag any unscrupulous activity enabling it to take stringent action against law breakers.

Commenting on the menace around counterfeiting, Bejon Kumar Misra, renowned consumer activist said "Counterfeiting is a global problem of enormous scale, impacting virtually every industry sector around the world including India. Such malpractices directly impact health, economy, education and society. India is suffering significant economic, health and safety consequences as a result of these widespread malicious practices. Businesses of all scale and sizes are observing widespread

proliferation of counterfeit technology or equipment, and suffer unanticipated costs in breakage, business downtime, and unenforceable warranties. We are working alongside government to create awareness among consumers and strengthen measures to make informed choice that will keep such peddlers at bay and help curb this problem."

Honda brand of power products have been the industry benchmark for over three decades and owing to its widespread acceptability across varied sectors ranging from agriculture to construction have started to attract the attention of counterfeiters off late.

As per the FICCI Cascade Report, trade in smuggling, contraband, counterfeit and pirated goods has risen steadily in the last few years

and now stands at 3.3 per cent of global trade. A spiraling trend of spurious products has been a cause of concern for various consumer activists and law enforcers too.

The problem has become especially acute in the past few years with unlicensed players from neighbouring developing countries trying to set up base here locally. In India, prominent ports like Kolkata, Chennai, Mumbai and Delhi that act like a feeder market have become a hub for unscrupulous peddlers to crack bulk deals for supplying fake goods and cheap imitation of genuine products. The Government of India has initiated various steps to address counterfeiting by improving its IP legal framework and enforcement system and by modernizing its IP administration.
